Re: Waste Analysis Plan and Document Repository Plan

Dear Mr. Papas:

The U.S. Environmental Protection Agency (EPA) received EGT's final versions of the Waste Analysis Plan and the Document Repository Plan on January 20, 2012. EPA has determined that the Waste Analysis Plan satisfies the requirements of 40 CFR § 146.68(a) and is approved as part of the permit file and operating conditions of EGT's Underground Injection Control (UIC) Permit Numbers MI-163-1W-C010 and MI-163-1W-C011. EPA has also determined that the Document Repository Plan satisfies the condition of Part II, D of the UIC permits to make copies of all required reports publicly available in a document repository and approves this plan.

Enclosed please find the approved Waste Analysis Plan and Document Repository Plan for your reference.

If you have any question regarding this matter, please call Allan Batka at (312) 353-7316 or e-mail batka.allan@epa.gov.

Sincerely yours,

Tinka G. Hyde, Director
Water Division
