John,

That's fine. We normally want to witness or have our contractor witness all MITs, but that obviously doesn't always happen. Therefore, I authorized you to run the MITs with the State inspector witnessing the tests.

Jeff

Subject: MIT Inspection March

Hi Jeff,

Can you respond to this e-mail so that I have documentation that the DEQ (Ray Vulgrinovich) was authorized to witness the mechanical integrity testing of our deep wells for the EPA? The reasons for my request are that the permits are specific about EPA witnessing the tests, and the confusion created in our own records for anyone looking back finding DEQ personnel in place of EPA personnel. This e-mail will then be attached to the inspection for clarification.

Thanks for you time.
